### DETAILED ACTION

1. This office action is in response to the amendment filed on 10/20/08.

#### *Allowable Subject Matter*

2. Prosecution on the merits of this application is reopened on claims 1-17 considered unpatentable for the reasons indicated below:

#### *Specification*

3. The disclosure is objected to because of the following informalities:  
On page 2, [0025], lines 7-9, recites "**the data processing device may be implement the functionality of the present invention as software on a general purpose computer**" which are 101 potential embodiments. Appropriate correction is required.

#### *Drawings*

4. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, "**a circuit for managing bursts of data**" in claims 16 and 17 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not

Art Unit: 2611

be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

5. Claims 1-17 are objected to because of the following informalities:

- (1) In claim 1, line 15, change “second alignment” to - - the second alignment - -;
- (2) In claim 16, line 2, change “the method” to - - the circuit --;
- (3) In claim 16, line 12, change “second alignment” to - - the second alignment - -;
- (4) In claim 17, line 12, change “second alignment” to - - the second alignment - -. Appropriate correction is required.

***Claim Rejections - 35 USC § 101***

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-17 are is/are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. While the claims recite a series of steps or acts to be performed, a statutory “process” under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an article or material) to a different state or thing. The instant claims neither transform underlying subject matter nor positively tie to another statutory category that accomplishes the claimed method steps, and therefore do not qualify as a statutory process.
